

Experience

- Oct 2023–Present **Maths Circle Tutor & Head Tutor, We Solve Problems**
Social club for maths-loving children, focused on fun and engagement in mathematics for pupils in school years 7-11. I supported students and tutored extra or hidden curriculum material. While acting as Head Tutor, I am responsible for the arrival and safe departure of the students. This includes managing the team of tutors in ensuring that we supervise the students at all times & that they are all comfortable with the material. Finally, I also present the examples at the beginning of each session, and work as a judge on any Maths Battle, a concept that I would like to bring into schools.
- Dec 2024–Present **Mathematics Tutor, Parallel by Simon Singh**
A home for curious mathematical minds. For ages 10-16 anywhere in the world. I provide group tutoring for students on UKMT questions to provide them with extra, more challenging mathematics. Often standard mathematics classes & the national curriculum fail to support strong young minds enough, which is where we come in. Since January 2026, I have been helping to present Parallel Circles to groups of students between 50 & 500 through YouTube live streams weekly. This has a focus on fun, engaging and fascinating mathematics that may often be overlooked, such as Fractals or the Mathematics behind Magic tricks. Alongside this, I create lessons, choose topics or details to teach and create detailed notes for future tutors to benefit from.
- Sep 2025–Present **Teacher of Mathematics, Queen's College, London**
In my day-to-day job at QCL, I teach Yrs 7-11 IGCSE Mathematics to prepare them for future qualifications and everyday life. I also teach Yr 13 the Edexcel A Level Mathematics Course. As well as being incredibly rewarding, having the opportunity to help students appreciate the beauty of mathematics is brilliant, through running the school assembly for Maths Week, running a masterclass for a range of local preparatory school students, and hosting a university level masterclass about Geometric Topology for the current Yr 12 group. Around the school I also support my tutor group, attend open/parents evenings & run a Cipher Lunch Club.

Education

- 2025 **Blackwell Prize, PGCE Mathematics, King's College London**
The Blackwell Prize is part of the broader recognition of teaching excellence, and I was awarded it for showing the most future promise in education.
- 2024–2025 **PGCE Mathematics, King's College London**
My first placement was at Prendergast School, an all girl's school situated in Ladywell. My second placement was at Chislehurst & Sidcup Grammar School where I taught a range of classes including Yr 12 and an A Level extension class covering STEP or MAT material.
- 2021–2024 **Mathematics BSc with Honours, King's College London**
Upper Second Class Honours
- 2019–2021 **A-Levels, Bexhill College**
Maths (A), Further Maths (A), Chemistry (A), AS Physics (A)
- 2014–2019 **GCSEs, Ark William Parker Academy**
12 GCSEs including Maths (9), Further Maths (A), Biology (7), Chemistry (9), Physics (9), English Lang (7)*

Talks

- July 2025 I was co-lead, with Amy O'Brien, at the recent KCL Mathematics Teachers' Conference 2025, where we presented a workshop about Generative AI within Teaching. This delved into a range of the capabilities, ethics and examples of how best to use Gen. AI to support teacher workload. Attendees were then provided with a range of materials from Yr 7 worksheets to an EoY Yr 12 exam paper.
- December 2025 I gave a positively peer-reviewed talk for KCL Mathematics PGCEs, regarding Layout, Design & Curiosity. This combined my own passion for mathematics and teaching, with a combination of ideas that I have collated through studying and working as a magician. Teaching is a performative job that can benefit greatly from the techniques used in other art forms.

Articles

- 7th May 2025 I work closely with Brook Tate, the creator of Multicolour Maths, a revolutionary new method to use colour to support students understanding of numeracy & arithmetic. During this time, *National Numeracy* incorporated the method as part of their National Numeracy Day and I wrote an article about [3 Ways to Use the Multicolour Workbook](#).

Hobbies and Interests

- Magician Close-up magician with over 10 years of experience. Deeply fascinated by the psychology, I try to find exciting ways to incorporate that way of thinking into everyday life. In my spare time, I have been developing a parlour show to combine my passions of magic & maths.
- Photography Amateur photographer with over 3 years of experience, focusing on street and portrait photography.
- Creativity Passionate about language, chess, and anything creative or interesting. I'm an avid puzzle solver and like to immerse myself into the curiosities of the world.
- Proposed Club I am aiming to run a lunchtime or after-school club recreating the BBC Radio 4 game *Just A Minute*, to indulge in language, improve literacy, and foster spontaneous creativity.

Skills

- Languages English (native)
- Technical Skills Mathematical modelling, data analysis, problem-solving in both academic and applied contexts.
- Software Proficient in Microsoft Office Suite, LaTeX, Desmos, basic programming (Python).
